Professional Summary

Computer Engineering graduate with hands-on experience in **Android**, **cross-platform**, and **full-stack development**. Proficient in **Kotlin**, **Jetpack Compose**, **Flutter**, **React.js**, and **Python**. Experienced delivering production-level applications in fintech, e-commerce, and analytics domains using REST APIs, WebSockets, and agile workflows.

Education

Bachelor of Engineering in Computer Engineering Expected Feb 2026
Kathmandu University School of Engineering, Dhulikhel, Nepal

- Relevant Coursework:** OOP, DSA, Web Technologies, DBMS, Mobile App Development, Software Engineering, Machine Learning, Computer Networks.

Work Experience

Android Developer Intern Dec 2025 – May 2026
Swift Technology Pvt. Ltd. (IME Group), Kathmandu, Nepal

- Built native Android features using **Jetpack Compose** and **MVVM architecture** with Android Jetpack components (ViewModel, LiveData, Navigation) within a fintech product ecosystem.

Software Developer Mar 2025 – Sep 2025
WEBMINIX TECHNOLOGY FZE LLC (Remote)

- Developed core modules for financial trading platforms (ForexDana, MT5-style) using **Flutter/Dart**, integrating **real-time WebSocket** market feeds and **secure REST APIs** for trading logic and account operations.
- Participated in agile sprint planning, code reviews, and debugging to ensure high-quality releases.

Part-Time Flutter & React Developer Oct 2024 – Feb 2025
Grow More Technology Pvt. Ltd., Lalitpur, Nepal

- Delivered cross-platform mobile apps in **Flutter** and responsive web interfaces in **React.js** with modular architecture, API integrations, and improved UI/UX flows across multiple projects.

Technical Skills

- Languages:** Kotlin, Dart, JavaScript, Python
- Mobile:** Jetpack Compose, KMP, Android SDK, MVVM, Jetpack (ViewModel, LiveData, Navigation, Room), Flutter
- Web:** React.js, Node.js, REST APIs, HTML5, CSS3, Tailwind CSS, Material UI
- Databases:** MySQL, PostgreSQL, MongoDB, Firebase, SQLite, Room
- Tools:** Git, GitHub, Android Studio, VS Code, Postman, Jira, Docker (Basic), Firebase

Projects

Forex Dana Clone *Flutter, Dart, WebSockets, Firebase, Syncfusion Charts* [GitHub](#)

- Engineered interactive candlestick charts, order placement modules, and real-time market data feeds.

MetaTrader Clone *Flutter, Dart, Firebase, REST APIs, WebSockets*

[GitHub](#)

- Built a MetaTrader-style interface with real-time price feeds, candlestick charts, and technical indicators (SMA, EMA, RSI, MACD) for Android, iOS, and Web.

E-Commerce Platform *MERN Stack, REST APIs*

[GitHub](#)

- Full-stack app with product CRUD, JWT authentication, cart management, and Stripe payment integration.

Stonk Watch *React.js, Flask, Alpha Vantage API*

[GitHub](#)

- Stock dashboard with live/historical charts, performance metrics, and user-configurable watchlists.

Diabetic Retinopathy Detection *Python, TensorFlow, Keras (ResNet50), Gradio* [GitHub](#)

- Trained a ResNet50 CNN to classify retinopathy severity from retinal scans; deployed via Gradio for real-time prediction.

Emotion / Sentiment Analysis *Python, NLTK, Scikit-learn, Flask*

[GitHub](#)

- Built an NLP preprocessing pipeline, trained ML classifiers, and deployed via a Flask web interface.

Languages

Nepali: Native | **English:** Professional | **Hindi:** Conversational
