Professional Summary

Android Developer with hands-on experience building native Android applications using **Kotlin**, **Jetpack Compose**, **Android SDK**, and **MVVM architecture**, complemented by professional experience in **Flutter**, **React.js**, and full-stack development. Experienced in developing fintech, trading, e-commerce, and analytics applications with REST APIs, WebSockets, real-time data, and modern UI architectures. Strong understanding of mobile application development, API integration, database management, and agile software development workflows.

Technical Skills

- Languages:** Kotlin, Dart, JavaScript, Python, Java
- Android:** Jetpack Compose, Android SDK, MVVM, ViewModel, LiveData, Navigation, Room, Kotlin Multiplatform (KMP)
- Cross-Platform:** Flutter
- Web:** React.js, Node.js, HTML5, CSS3, Tailwind CSS, Material UI, REST APIs
- Databases:** MySQL, PostgreSQL, MongoDB, Firebase, SQLite, Room
- Tools & Platforms:** Git, GitHub, Android Studio, VS Code, Postman, Jira, Docker, Firebase

Work Experience

Android Developer Intern

Dec 2025 – May 2026

Swift Technology Pvt. Ltd. (IME Group), Kathmandu, Nepal

- Developed native Android features using **Kotlin** and **Jetpack Compose** within a fintech product ecosystem.
- Implemented application architecture using **MVVM** and Android Jetpack components including ViewModel, LiveData, Navigation, and Room.
- Integrated UI components and application logic while following modular and maintainable development practices.
- Collaborated with developers through debugging, testing, code reviews, and iterative feature development.

Software Developer

Mar 2025 – Sep 2025

WEBMINIX TECHNOLOGY FZE LLC (Remote)

- Developed core modules for financial trading platforms using **Flutter** and **Dart**, including Forex-Dana and MetaTrader-style applications.
- Integrated real-time **WebSocket** market feeds and secure **REST APIs** for trading operations, account management, and live market data.
- Implemented interactive trading interfaces including candlestick charts, order placement, market data displays, and technical indicators.
- Participated in agile sprint planning, code reviews, debugging.

Part-Time Flutter & React Developer

Oct 2024 – Feb 2025

Grow More Technology Pvt. Ltd., Lalitpur, Nepal

- Developed cross-platform mobile applications using **Flutter/Dart** and responsive web applications using **React.js**.

- Built reusable and modular components with API integrations and structured application architecture.
- Improved application interfaces and user flows while working closely with project requirements and development teams.

Projects

Meeting Room Booking System *Jetpack Compose, Kotlin, Retrofit, Hilt, MVVM, Clean Architecture* [GitHub](#)

- Developed a corporate meeting room reservation platform that streamlines room scheduling, booking management, and resource allocation within organizations.
- Implemented real-time room availability tracking, calendar-based booking, conflict detection, and meeting analytics dashboards.
- Built a scalable architecture using MVVM, Clean Architecture, Hilt Dependency Injection, Retrofit, and Kotlin Coroutines to ensure maintainability and high performance.

ForexDana & MetaTrader Inspired Trading Apps *Flutter, Dart, Firebase, WebSockets, REST APIs, Syncfusion Charts* [GitHub 1](#) | [GitHub 2](#)

- Built two trading applications featuring real-time market data, interactive candlestick charts, and order placement functionality, with WebSockets powering live market updates and Firebase managing application data.
- Implemented a MetaTrader-style interface with real-time price feeds and technical analysis tools, including SMA, EMA, RSI, and MACD indicators.
- Delivered both apps across Android, iOS, and Web using Flutter's cross-platform architecture.

Stonk Watch *React.js, Flask, Alpha Vantage API* [GitHub](#)

- Developed a stock market dashboard displaying live and historical market data, performance metrics, and interactive charts.
- Implemented configurable watchlists for tracking selected stocks.

Diabetic Retinopathy Detection *Python, TensorFlow, Keras (ResNet50), Gradio* [GitHub](#)

- Trained a ResNet50-based CNN to classify the severity of diabetic retinopathy from retinal images.
- Deployed the trained model through a Gradio interface for real-time predictions.

Emotion & Sentiment Analysis *Python, NLTK, Scikit-learn, Flask* [GitHub](#)

- Developed an NLP pipeline for text preprocessing, feature extraction, and sentiment classification.
- Trained machine-learning classifiers and deployed the model through a Flask web interface.

Education

Bachelor of Engineering in Computer Engineering **Dec 2021 – Jul 2026**
Kathmandu University School of Engineering, Dhulikhel, Nepal

+2 (Higher Secondary Education) **2018 – 2020**
Arniko Awasiya Secondary School, Nepal

Languages

Nepali: Native | **English:** Professional
